

### Patient Dosage Card

Taking Coartem®/ Riamet® to treat malaria.

**You must take it exactly as recommended for 3 full days, otherwise the infection may return.**

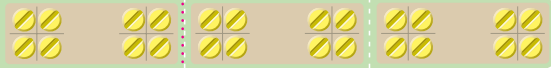

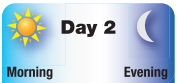

### BODY WEIGHT

5 to less than 15 kg

15 to less than 25 kg

25 to less than 35 kg

Adults & children 35 kg & above

Take the right dose at the right time.

- Begin treatment right away.
- Take each tablet with high-fat food or drinks (for example milk.)
- For small children, crush the tablet before giving it.
- If you are vomiting within 1 hour of taking Coartem®/Riamet®, repeat the dose and get additional tablets from your pharmacist.

- **Make sure that the FULL 3 days treatment is taken at the recommended times.**

- Take the first dose immediately, the second dose 8 hours later. Take the remaining doses in the morning and again in the evening of days two and three, until the pack is finished.

**Coartem® / Riamet® must be given to patients together with the package leaflet for complete safety information. Ask your doctor or pharmacist for the package leaflet if you have not received one.**
